

# RELEASES BY INDUSTRIAL ACTIVITIES USER'S GUIDE

User's Guide to search public information on PRTR-  
Spain

## What information can you consult here?

In this section the user can find information on the emissions generated by industrial sites according to the different industrial activities and other search criteria the user selects.

SEARCH Help ?

(1)

(2) **Industrial Activities**

(3) **Releases**

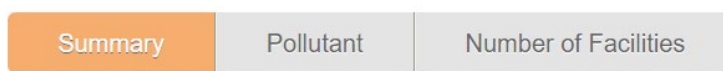

(4)

**(1) Reference year.** Allows the user to filter by facilities that have public data for that year. If you want to search installations by geographical region, the search engine provides fields to filter facilities by **Autonomous Regions** and by **River Basin Districts** (it allows multi-selection).

**(2) Industrial Activities.** Allows the user to perform searches by filtering according to the industrial activities included in the PRTR-Spain Register, which are described in Annex 1 of Royal Decree 508/2007 and its subsequent amendment in Annex 5 of Royal Decree 815/2013.

**(3) Releases.** Allows the user selecting a receiving medium according to whether the release is to air, to water (direct or indirect) or to soil. Also, this field allows multi-selection.

The **result** obtained is displayed in 3 different ways:

- **Summary.** The first tab displays the following information per query:
  - The number of PRTR activities with public information.
  - The total number of complexes with validated data.
  - The total number of complexes with public information.
  - The total number of complexes in the Register

- **Polluting substances.** This tab provides information on the pollutant load of the selected industrial activity by type of substance. In addition, you can make a comparison of the number of substances emitted by geographical area.
- **Number of complexes.** The last tab shows the number of facilities that have generated emissions and have public information by geographical area and according to the selected criteria.
